1909

The State Medical Board of Ohio was created through adoption of the Ohio Medical Practice Act

First female to receive an Ohio license was Sarah A. Tilden

1905 Medical Board

Allopathic vs. Osteopathic

Allopathic medicine is considered the classic form of medicine and focuses on the diagnosis and treatment of disease.

Osteopathic medicine is centered on a holistic approach. Including specific training using a hands-on approach to diagnose and treat illness or injury with an emphasis on preventative medicine.

Both physician types are fully licensed, prescribe medication, treat illness and perform surgery.
