About Partners in Professionalism

The Partners in Professionalism (PIP) program is an opportunity for the State Medical Board to educate medical students about the responsibility of medical licensure and the consequences of violating Ohio regulation. The board desires to make a lasting impact on these students and the formation of their careers.

Activities in the PIP program may include:

- In-person/virtual presentations
- Panel discussions
- Exhibitor booth at school event
- Visit to a board meeting

The board looks forward to further expanding the PIP program to other schools in Ohio and will continue to partner with educators in preparing young health professionals for their futures.

If you would like the Medical Board to be a part of your program’s curriculum, email communications@med.ohio.gov with Partners in Professionalism in the subject line.
